SUMMARY

Creative and detail-oriented **Full Stack Developer** with hands-on experience in **Frontend Development**, **Backend Development**, **UI/UX Design**, **Cloud Computing**, and **Machine Learning** through academic projects and production-style web application development. Experienced in building scalable applications using **React.js**, **Next.js**, **Node.js**, **Express.js**, **Python**, **Flask**, **MongoDB**, **MySQL**, and **REST API Development**, while applying **Object-Oriented Programming (OOP)**, **Software Development Life Cycle (SDLC)**, **Problem Solving**, **Data Structures**, and **Algorithms** to deliver efficient software solutions.

Skilled in developing responsive and accessible user interfaces, implementing **Role-Based Access Control (RBAC)**, designing interactive user experiences using **Figma**, and deploying applications using **Amazon Web Services (AWS)**, **Docker**, **Vercel**, and **Netlify**. Passionate about **UI/UX Design**, **Game Development**, **Game Testing (QA)**, **Cloud Technologies**, and modern software engineering practices. Familiar with **Unity**, **Unreal Engine 5**, **Blender**, and **Adobe Photoshop**, with a strong interest in building immersive digital experiences and scalable software products.

SKILLS

Full Stack Development

Full Stack Development, Frontend Development, Backend Development, REST API Development, Object-Oriented Programming (OOP), Problem Solving, Software Development Life Cycle (SDLC), Responsive Web Development, Application Development, Debugging & Troubleshooting

Frontend & UI/UX Design

React Development, Next.js Development, Responsive Web Design, Accessible UI Design (WCAG), UI/UX Design, Wireframing, Prototyping, User Interface Development, User Experience Design, Interaction Design

Cloud & DevOps

Cloud Computing Fundamentals, Amazon Web Services (AWS), Docker, Containerization, Continuous Integration & Continuous Deployment (CI/CD), Linux, Deployment Automation, Cloud-Native Development

Game Development & Design

Game Design, Game Development Fundamentals, Game Testing (QA), Level Design Fundamentals, Gameplay Mechanics, Interactive Media Design, Quality Assurance, User Experience Testing

Software Engineering Practices

Requirement Analysis, Version Control, Agile Methodology, API Integration, Authentication & Authorization, Role-Based Access Control (RBAC), Cross-functional Collaboration, Documentation

Professional Skills

Analytical Thinking, Creativity, Communication, Problem Solving, Team Collaboration, Critical Thinking, Adaptability, Time Management, Continuous Learning

TECHNICAL SKILLS

Programming Languages: Python, JavaScript (ES6+), SQL, HTML5, CSS3

Frontend Technologies: React.js, Next.js, HTML5, CSS3, Responsive Web Design

Backend Frameworks: Node.js, Express.js, Flask

Databases: MongoDB, MySQL

Cloud Platforms: Amazon Web Services (AWS), EC2, S3, Lambda

DevOps & Containerization: Docker, RabbitMQ, Vercel, Netlify

UI/UX & Design Tools: Figma, Adobe Photoshop

Game Development Tools: Unity, Unreal Engine 5, Blender

Version Control: Git, GitHub

API Development & Testing: REST APIs, Postman

Development Tools: Visual Studio Code (VS Code)

AI & Machine Learning: Python Machine Learning Fundamentals

PROJECT

EventBOOK – Full Stack Event Booking Platform

React.js | Python | Flask | MongoDB | REST APIs | RBAC | Figma

- **Developed** a production-style **Full Stack Event Booking Platform** supporting organizers and customers through secure role-based workflows.
- **Designed** responsive and accessible user interfaces using **React.js** and **Figma**, improving overall user experience.
- **Implemented** secure **Role-Based Access Control (RBAC)** to manage user permissions and protect organizer functionalities.
- **Developed** scalable **REST APIs** using **Flask** and integrated **MongoDB** for efficient data management.
- **Built** a real-time organizer dashboard for event tracking, booking management, and capacity monitoring.
- **Performed** testing, debugging, and optimization to improve application reliability and user experience.
- **Documented** application architecture, API endpoints, and software implementation following **Software Development Life Cycle (SDLC)** practices.

Smart E-Commerce Checkout Workflow

Node.js | Express.js | MySQL | RabbitMQ | JavaScript | React.js

- **Developed** a **Microservices-Based E-Commerce Checkout System** using **Node.js**, **Express.js**, and **MySQL**.
- **Implemented** asynchronous communication using **RabbitMQ**, improving scalability and fault tolerance.
- **Designed** a multi-step checkout interface using **React.js** with responsive validation and real-time feedback.
- **Developed** modular **REST APIs** supporting payment, inventory, cart, and discount management.
- **Optimized** database interactions and backend workflows to improve transaction efficiency.
- **Performed** API testing, debugging, and validation to ensure reliable business operations.
- **Documented** system architecture, API specifications, and deployment workflows.

Flight Price Predictor

Python | Machine Learning | JavaScript | HTML5 | CSS3 | REST APIs

- **Developed** a **Machine Learning** application predicting flight ticket prices using **Python** and supervised learning techniques.
- **Designed** responsive and accessible web interfaces following **WCAG 2.1** accessibility standards.
- **Implemented REST APIs** connecting machine learning predictions with frontend user interfaces.
- **Optimized** user interaction through progressive data entry and real-time prediction feedback.
- **Performed** model evaluation and debugging to improve prediction reliability.
- **Enhanced** application usability through interactive result visualization and error handling.
- **Documented** machine learning workflow, API integration, and application architecture.

EDUCATION

Master of Computer Applications (Cloud Computing)-Pursuing

LEAD College (Autonomous), Kerala • Kerala , India

Bachelor of Computer Applications (BCA)

Tharananellur Arts and Science College • Kerala, India • 2025

CERTIFICATIONS

React – Frontend Development

Flutter – Cross-Platform Mobile Application Development

Ethical Hacking – Cybersecurity Fundamentals & Penetration Testing

Internet of Things (IoT) – Connected Systems & Embedded Device Programming

ACHIEVEMENTS

Built multiple production-style Full Stack Applications demonstrating modern web architecture and scalable software engineering practices.

Participated in the Zomathon – The Data Hackathon (Coding Ninjas × Eternal/Zomato), applying analytical thinking and collaborative problem-solving to real-world data challenges.

Developed and deployed an AI-powered Full Stack Application during the Vibe Coding Hackathon – GetWork.ai (2025) under strict project timelines.

Maintains an active GitHub Portfolio with 6+ full-stack projects, showcasing clean code practices, version control, architecture documentation, and API design.

Designed accessible and responsive web interfaces following WCAG 2.1 standards to improve usability and user experience.
